To give something without knowing its form

An uncountable amount of people are interested in art

What is this amount ? A hand of people, a Kilogramm, a bunch...

Ce n'est pas loin

What does this mean ? Its not far

How many Kilometers or how many feet ?

Is a foot a un

SON DES RUBANS DE MÈTRE SUR LE SOL + RYTHME AVEC LES PIEDS (OFF)

**ONE FOOT ONE METER ONE FOOT ONE METER ONE FOOT ONE  
METER ONE FOOT ONE METER ONE FOOT ONE METER ONE FOOT**

But meter is uncountable by its non sens.

A meter is always alone or is part of an unknown amount of meters that would be DISTANCE, length, width, etc... SOUND

We come back to the first point

Distance is like sound

un - count - able / not able to count

If one meter is uncountable so you may not encounter one meter so give up adding one meter to another in order to encounter one meter

**Distance is not count able to encounter**

**A meter could be your friend so it would be countable**

**You'll have one friend - one meter**

**So you wouldn't have to add another meter to it**

**in other words, one countable friend is better than a bunch of  
uncountable friends**
